Reg No 2008/018506/07

**Company Profile**

## WHO ARE WE

**FHP Consulting Engineers** is based in Potchefstroom within the North West Province of South Africa. The original company was founded in 1956 as Fick Hollenbach and Partners and although the founding members are not involved in the business any more, the current management team is proud of our heritage and company brand. We are currently a level 3 BEE business entity.

We are a privately owned Civil Engineering Consulting Firm specializing in Municipal Infrastructure, a very broad and interesting field within Civil Engineering. Our offering include:

1. Bulk Municipal infrastructure
2. Residential developments
3. Roads and transportation
4. Project management and Turnkey developments
5. Industrial / Commercial developments
6. Mining Infrastructure
7. Surveying
8. Master and Maintenance planning

We are Municipal Infrastructure Specialist with a proven record. Our aim is to remain a trusted service provider firstly in our immediate and surrounding area, but also to grow our footprint to where our current and future clients operate.

We have a passion for making a difference, with a strategy to remain small enough to ensure personal relationships with our Clients, but also to grow the business to offer sustainable career opportunities for our staff.

Current projects include private and government developments where these projects are implemented using trusted Engineering and Project Management principals.

Note: Full list of current and completed projects can be supplied on request.

# ACCREDITATION/ MEMBERSHIP

The Engineering Profession Act, 2000, (Act 46 of 2000) as well as other Acts, provide for the reservation of work of an engineering nature for the exclusive performance by registered persons.

FHP Consulting Engineers comply with this requirement and have two professionally registered persons employed as full-time employees. Both are registered as Professional Engineering Technologists with ECSA (Engineering Council of South Africa)

Systems of professional registration are common in South Africa, and across the world, and are generally recognised as conferring professional status onto those registered under said system.

The ECSA provides the only recognised registration system for engineering in South Africa - recognised both locally and abroad, as well as by other professions.

The informed public recognises the value of professional registration, for the same reasons as in inter-professional recognition as it affords them an additional measure of protection and “peace of mind”.

# MANAGEMENT TEAM

**Gerard Uys** is the Managing Director of FHP Consulting Engineers, a role that he has been successfully fulfilling for the past 12 years. Gerard is an ECSA registered Professional Engineering Technologist with more than 40 years of experience within the civil and municipal engineering fields. Gerard brings a wealth of experience, extremely important to manage risk and quality in the consulting engineering field.

**Dries Joubert** is an ECSA registered Professional Engineering Technologist with more than twenty (20) years of experience in the Civil Engineering Environment. He holds a B-Tech degree in Water Engineering. He specializes in Municipal Infrastructure for residential, industrial, commercial and mining projects. This entails bulk earthworks, roads and parking, water, sewer

and storm water. His project involvement ranges from inception and concept stage to implementation with experience in design, feasibility studies, contract documentation and project implementation.

**Eksteen Uys** is a Project and contracts Manager that has 18 years of experience within the civil construction industry. He has vast experience in roads, sewer and water reticulation construction with a background in the construction of sports fields and recreational parks to and to his experience. Although his only formal education only entails an NQF level 6 in project management, his hands-on approach to dealing with the overseeing of projects and contracts makes him a valuable asset to the company.
